Description

CSF1, also known as MCSF, is a four-a-helicalbundle cytokine that controls the production, differentiation, and function of macrophages. The active form of the protein is found extracellularly as a disulfide-linked homodimer, and is thought to be produced by proteolytic cleavage of membrane-bound precursors. This protein may be involved in development of the placenta.

Specification

Aliases : MCSF Entrez GeneID : 1435

Swissprot: P09603 clone: 2D10

WB Predicted band size : 60kDa

Host/Isotype : Mouse IgG1

Storage : Store at $4\,^{\circ}\text{C}$ short term. Aliquot and store at -20 $^{\circ}\text{C}$ long term. Avoid

freeze/thaw cycles.

Species Reactivity: Human

Immunogen: Purified recombinant fragment of human CSF1 expressed in E. Coli.

Formulation: Ascitic fluid containing 0.03% sodium azide.

Application

IHC 1/200 - 1/1000 ELISA 1/10000
